WORK EXPERIENCE

Laboratoire d'Informatique en Image et Système d'Information

Lyon, France

Intern in Development, Machine Learning

May 2023 - Present

- Engaging in the APAPS (Adaptive and Privacy-Aware Persuasive Strategy for behavior change) project, which aims at development and implementation of **privacy-preserving persuasive strategies** for healthy food promotion.
- Exploring the fusion of recommender systems and persuasion strategies to overcome the individual limits of each domain to better support the user in behavior changes.
- Skill: Docker, Restful API, Shell script, Django, Python, Machine Learning, Collaborative Filtering, Version Control

Astrophysical Research Center of Lyon

Saint Genis Laval, France

Intern in Data Analytics

June 2022 – September 2022

- Analyzing the dataset of astrophysical images taken by HARMONI instrument, European Southern Observatory
- Proposing model for evaluation of light intensity of astrophysical images by studying the accuracy score of models on the dataset.
- Skill: Image Processing, Data visualization, Linear Regression, Python, numpy, scikit-learn, documentation

EXTRA-SCOLAR ACTIVITIES

Hong Teck Lyon - Lion Dance Association

September 2021 - Present

- Lion dance: traditional activity of Vietnam
- Doing shows around the France and Europe, on Lunar New Year, Inauguration of Hotel, Restaurant, Wedding Ceremony

EDUCATION

National Institute of Applied Sciences of Lyon (INSA Lyon)

Lyon, France

Master of Science, Computer Science

September 2021 - Present

Senior year student

Holder of Gaston Berger Scholarship: INSA de Lyon Foundation conducted by Gaston Berger Institute identifies students with outstanding academic performance.

Related courses: Machine Learning, Optimization, Image Processing, Operating System, Network & Security, Agile

CY Tech, University of Cergy Pontoise

Cergy, France

Preparatory class of Science

September 2019 – September 2021

GPA: 17.2/20 (Mathematics: 18.6, Intro to Computer Science: 17.8, Physics: 15.6)

Related courses: Calculus, Linear Algebra, Physics, Informatics

NOTEWORTHY PROJECTS

Convolutional Neural Network for automatic tennis commentary

- Domain: Computer Vision, Machine Learning
- Building a dataset of mp4-format videos.
- Cutting videos into frames to capture players' silhouettes.
- Predictive model to detect type of shot and ball trajectories.

Predictive model for "Housing prices in King County" dataset on Kaggle

- Building models: linear regression, Ridge regression, kernel regression, random forest, and neural network.
- Studying the bias, variance of each model, accuracy score on the training, validation, and test dataset to select the best performant model.

ADDITIONAL INFORMATION

Certifications: Machine Learning Specialization (Coursera), Cambridge Linguaskill Test level C1

Interests: Sport (table tennis, tennis, swimming, football), reading books, coding

Language: English, French (fluently professional), Vietnamese (native speaker), German (beginner)
